MS Colorfast45 Paint System

We use high quality paint systems designed to provide long term performance and protection. Each coating is formulated with thoroughly researched, tested and field proven pretreatments, primers, resins, and pigments that can meet your standard and performance requirements.

This is a thermoset coating system composed of polyester resin which has been modified with a silicone resin. Much like PVDF finish, the MS Colorfast45 finish offers good protection to the elements with special consideration to chalk and fade resistance, durability, and chemical resistance.

Color selections are close representations but are limited by processing and viewing conditions. Actual samples are available by request. For all specific warranty, application, installation, and technical information regarding these products, contact your representative.

* Low Sun Reflective Value
